

ranked as one of Arizona's fastest growing communities, and it is my great privilege to acknowledge this important milestone.

Avondale began as an agricultural community, as many in Arizona. William Moore built the community's first establishments. As the area attracted more settlers through its pleasant climate and favorable farming conditions, a post office was built at the Avondale Ranch in the early 1900's, lending the town its current name. On December 16, 1946, Avondale was incorporated as a city, and by then was an important part of the state's capitol.

Today, Avondale has reached a population exceeding 70,000, and has much to offer its residents. To keep up with the population's demands, the city offers a wide variety of academic establishments, arts festivals, among other cultural attractions, and is a favored destination of NASCAR fans. Because of these draws and the accomplishments of residents, Avondale enjoys a growth rate among the Nation's highest, and expects to reach 120,000 residents by 2020.

Avondale has come a long way from its agricultural beginnings. It is my great pleasure to congratulate them on this landmark.

**A TRIBUTE TO LIEUTENANT  
GENERAL JERRY SINN**

**HON. JERRY LEWIS**

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, December 7, 2006*

Mr. LEWIS of California. Mr. Speaker, I rise today to pay tribute to the leadership and dedication to public service of Lieutenant General Jerry Sinn, who has provided exemplary stewardship of the Army's resources and budgeting for the past 7 years. Beginning as a "tunnel rat" in Vietnam, Lieutenant General Sinn has retired as the Army's budget chief after 39 years in uniform.

After being drafted in 1968, Jerry Sinn was soon commissioned as a second lieutenant in the Corps of Engineers. The Army sent him to Vietnam shortly thereafter, where he fought as a tunnel rat—one of the deadliest missions in that conflict—and led a Rome Plow team. Throughout his career, he has never stopped inspiring, guiding and teaching soldiers—whether as a company commander in Korea, a mathematics instructor at West Point, a battalion commander with the Big Red One, an assistant chief of staff of VII Corps, a brigade commander in the 3rd Infantry Division, or commander of the Corps of Engineers' North Atlantic Division.

Lieutenant General Sinn has spent the last 7 years of his military career in the Pentagon as the Army's top uniformed budget official. His ideas, acumen, finesse and good humor were essential to guiding the Army from being a force at peace to a force at war. General Sinn oversaw the unprecedented growth in resources and mission since 2001, dedicating himself to ensuring that every soldier was properly equipped and trained. He looked after families, initiating and pushing numerous programs to improve their quality of life. And he made sure that everyone involved in financial management understood the importance of their work. General Sinn inspired the civilians and the uniformed members of Army financial management to do their very best and ap-

proach their tasks with the same vigor as the soldier on the battlefield. He also provided counsel to the Army leadership, the Defense Department, the Office of Management and Budget and many members of Congress.

General Sinn earned a Purple Heart and two Bronze Stars, both with oak leaf clusters and one with a V Device, among many other medals and awards. He lived the Soldier's Creed with great pride and dignity. He always placed the mission first. He never accepted defeat. He never quit. And though he could have, he never left a fallen comrade.

Mr. Speaker, throughout his youth in North Dakota, Jerry Sinn thought he would follow in his parents' footsteps, raising cattle and growing wheat. The U.S. Army, and his many supporters in Congress, are grateful that he devoted his life to public service instead. Please join me in thanking him for those 39 years of selflessness, and wish him well in his future endeavors.

**TRIBUTE TO GRACE CHURCH**

**HON. RODNEY P. FRELINGHUYSEN**

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

*Thursday, December 7, 2006*

Mr. FRELINGHUYSEN. Mr. Speaker, I rise today to honor Grace Church in the Borough of Madison, Morris County, New Jersey, a vibrant community I am proud to represent! On November 4, 2006, the good citizens of Madison celebrated Grace Church's 150th Anniversary.

Grace Church, the oldest building in Madison, New Jersey still being used for its original purpose, is one of the largest congregations in the Episcopal Diocese of Newark. The first church service was held on April 13, 1856. When completed, the building, including bell and organ, cost about \$9000 and seated two hundred persons. One hundred and fifty years later Grace Church is undergoing a \$3,000,000 capital campaign to enlarge the existing structure to meet the needs of a still growing congregation.

The earlier years in the history of Grace Church were marked by building and consolidating, participation of a wide segment of the community: black and white, abolitionist and slave owners, recent immigrants and colonial heirs. A new era for Grace Church arrived when more than ninety millionaires moved to Morristown and neighboring towns, many of whom were Episcopalian. Their generosity enabled the church to enlarge, but, unfortunately, membership did not grow as there was no need to broaden the financial base with increased membership. That changed after World War II, with the population explosion that followed the war and the resulting exodus to the suburbs. This brought Grace Church to a new era in its history and in the 1950's the church underwent a major expansion.

Today Grace Church's congregation includes parishioners from all the neighboring towns and its primary focus is outreach. A wonderful choir, with members of all ages, a large and active youth program, and many adult ministries fill the church 7 days a week. Under the leadership of the Reverend Lauren Ackland, the membership continues to grow.

Mr. Speaker, I urge you and my colleagues to join me in congratulating Grace Church of

Madison on the celebration of its 150 years serving its parishioners County.

**TRIBUTE TO THE DEDICATED  
STAFF OF THE SUBCOMMITTEE  
ON SPACE AND AERONAUTICS  
FOR THE 109TH CONGRESS**

**HON. KEN CALVERT**

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, December 7, 2006*

Mr. CALVERT. Mr. Speaker, I rise today to honor and pay tribute to a group of patriots whose dedication and contributions to the United States space community has been exceptional. For the past 2 years I have served as the Chairman of the Science Subcommittee on Space and Aeronautics and have had the honor to work with a staff comprised of some of the best and brightest in the fields of space and earth science, aeronautics and space exploration.

In the 2 years that I've been Chairman, the staff has worked diligently to implement the President's Vision for Space Exploration, maintain robust science and aeronautics programs and open opportunities for the private sector and space entrepreneurs. In short, they have tried to give America's space-farers the "Rules and Tools" to succeed in the Second Space Age. Last year, the President signed into law the first NASA Authorization Act in 5 years. Anyone can tell you how difficult it is to draft legislation that must balance the many needs of the Agency's various stakeholders while keeping the original Vision intact. The majority subcommittee staff worked tirelessly to secure passage and I commend their hard work and dedication. It certainly has paid off—NASA is charging full speed ahead with the Vision for Space Exploration and a commitment to ten healthy centers.

The subcommittee completed several resolutions commending successful shuttle launches and their crews; conducted hearings on a wide range of topics including "The Future of Aeronautics at NASA," "Future Market for Commercial Space," and "The NASA Workforce"; and conducted several legislative mark-up hearings on other relevant bills. The subcommittee even conducted the first hearing in Congressional history with a witness testifying from space when NASA astronaut John Phillips, a member of the crew aboard the International Space Station in June 2005, participated via satellite. The efforts of the subcommittee staff also enabled me to visit all of NASA's Centers, including the Jet Propulsion Laboratory and the Applied Physics Laboratory, during the 109th Congress. None of this would have been possible without the intelligence and perseverance of the staff.

At this time I would like to recognize the individuals responsible for the subcommittee's many accomplishments:

Bill Adkins, former Staff Director. Bill was a thoughtful advisor and an influential force in the passage of the NASA Authorization Act during the 18 months we worked together.

Johannes Loschnigg, current Staff Director. Johannes has done a terrific job and has offered solid leadership to the subcommittee.

Ed Feddeman, Professional Staff. Ed is the resident expert on aeronautics and space science. I have appreciated his depth of
